I am eager to apply my skills and expertise to enhance your company's operations and contribute to its ongoing success.

I am seeking an opportunity in a dynamic and growth-oriented environment to further enhance my skills and contribute to impactful projects. I am also exploring relocation options due to the current situation in my country.

EDUCATION

2013 – 2019 B.C.Sc (Bachelor of Computer Science),
Taunggyi, Myanmar University of Computer Studies, Taunggyi ☑

2019 Graphic Design, Creativo 27 Design House Yangon, Myanmar

2023 Architecting for AWS, HelloCloud.io

ZUZ3 Myanmar

PROFESSIONAL EXPERIENCE

2021 December – present Singapore

Ecommerce Focused workplace, Web Developer (Remote)

I am responsible for a range of key duties, including monitoring site performance, crafting customized modules to meet different business needs, integrating with third-party systems, ensuring the ongoing maintenance and enhancements of our e-commerce website, and proficiently deploying code through Git Extension and BitBucket. I have successfully completed the following projects in my current position:

- 1. Shipment Creation System
 - Integrate with DHL shipping API
 - Create parcel shipping order entry system by using C#, Razor
- 2. Export Sale order data System
- Integrate with Mallcoo (China) and Emaar (Dubai)

- Window Form Application and console application created by C#
- Created for the purpose of importing Sale data from e-commerce websites to respective databases by daily and monthly window scheduler
- 3. Static Webpage
 - JSON-Powered webpage project
 - Developed mainly with React.js

2018 October – 2021 October Myanmar

DynamicWeb, Web Developer 2

I've had the opportunity to collaborate on various projects with both local and international colleagues. I have successfully created multiple Ecommerce projects utilizing the DynamicWeb Ecommerce Engine, integrated with the Navision ERP system, facilitated integration with the payment provider (2C2P), coordinated integration with shipping providers (Marathon and Ninjavan), and additionally developed REST APIs to support our Ecommerce mobile application.

I described some of the projects that I worked on during this company as follows:

- 1. Pet Lover Center (www.petloverscentre.com)
 - E-commerce website Singapore
 - Developed with C#, ASP.net, Razor, and other frontend technology like HTML, CSS, JS
 - Maintained and enhanced the site performance and functionality
- 2. Commune Life (thecommunelife.com)
 - Worked as a main developer
 - Focused on API Development, Business logic, and Frontend designing
- 3. Lasource Group Myanmar (lasource.com.mm)
 - Worked as a main developer
 - Integrated with Payment provider and shipping provider for checkout process
 - Developed different sale report systems for the seller
- 4. LPG Gas Singapore
 - Delivery and sales management system for the in-house team
 - Focused on business logic development

2019 May – 2019 July Myanmar

Acroquest Myanmar Co.Ltd, Internship

I have been responsible for creating JUnit test cases and conducting software testing using automatic testing tools. Additionally, I've developed server-side functions based on Java and the Spring framework, ensuring the reliability and performance of our software solutions.
